

Aidance Skincare Ingredients - The Safest & Best for Your Skin

Aidance products are unsurpassed in their simplicity and effectiveness. Each product is formulated with our patented tetraSILVER® Silver Oxide (a molecule of silver and oxygen) and just a few additional natural ingredients, including jojoba oil, beeswax, and essential oils. This combination ensures their highest quality and safety. We use as few ingredients as possible so you get the purest ointment, cream or lotion.

- No hidden ingredients
- No harmful chemicals
- No dangerous side effects
- No parabens

SILVER: Earth's Natural Germ Fighter

For over 3000 years, silver has been used as a natural way to inhibit the growth and spread of bacterial, viral and fungal germs. Silver spoons, mugs and pitchers are examples. American Pioneers kept silver dollars in their milk buckets to retard spoilage. Today, silver is used as the leading burn therapy in the world because of its proven effectiveness fighting infection and healing damaged skin.

Learn more about Silver's History as a Broad-Spectrum Anti microbial

The silver in Aidance products is a patented Silver Oxide called tetraSILVER®. While all other silvers are just simple forms, tetraSILVER is a unique molecule comprised of four (4) atoms of silver and four (4) atoms of oxygen.

OXYGEN: Natural Skin Repair

Oxygen fights infection by killing germs (many of which cannot survive in an oxygen-rich environment). An increase in oxygen also helps heal skin by fostering the growth of tiny blood vessels that funnel in important nutrients and keeps existing blood vessels open. Each tetraSILVER Silver Oxide molecule contains four oxygen atoms, which is part of the reason Aidance products can your skin to quickly restore its natural health.

JOJOBA OIL: Soothing and Moisturizing

People have been using Jojoba oil as a skin treatment for centuries. Native Americans used to extract the oil from jojoba beans as a treatment for cuts, sores and bruises, and sunburns. Jojoba oil is naturally moisturizing and beneficial for all skin types. It is quickly absorbed by the skin, so the jojoba helps draw the silver, oxygen and other ingredients to the source of the skin problem.

Learn more about Jojoba's Outstanding Moisturizing Qualities.

BEESWAX: Softening and Calming

Beeswax is one of the oldest ingredients used in skin care because it does wonders for softening the skin. The substance, made by bees to build the walls of their honeycomb, is used as a thickening agent in cosmetic products. Recent studies have also documented beeswax's anti-inflammatory properties, making it an ideal ingredient for skin restoration.

Learn more about Beeswax's Historical Uses in Skin Care.

ESSENTIAL OILS: Aromatic Healers

Essential oils are pure extracts from various plants. Despite the word 'oil,' essential oils are actually not oils. The finest plant-based essential oils are selected for Aidance products because of their natural ability to resolve specific skin problems. Essential oils help the skin detoxify and regenerate. Essential oils have been used for healing throughout history and are still key elements in many of the world's non-Western healing traditions. In Europe, they are considered an effective, treatment that are increasingly being integrated with conventional medicine.
